

OBI PUBLIC TALKS

Bring Learning to Life

IN PARTNERSHIP WITH:

Dimensions of Care

Community care is a key factor in supporting brain health. Learn about its different forms and how you can help shape the future of care in your communities.

Brain disorders, such as concussion, epilepsy, and depression, have societal impacts beyond the one in three individuals living with the condition. Family, friends, co-workers, and community are all affected and their involvement is essential in providing much needed care and support.

So, what does it take to think beyond the traditional boundaries of healthcare? And how can we, as a society, put the right support in place to improve the lives of people with brain disorders?

In this OBI Public Talk, join a group of experts ready to share proven pathways to care as well as identify community organizations set up to support those in need.

SPEAKERS:

Denis Boileau, Executive Director of Vista Centre Brain Injury Services, an organization supporting people whose lives have been affected by acquired brain injury

Dr. Fatimah Jackson-Best, Assistant Professor, McMaster University and Project Manager for the Black Health Alliance's Pathways to Care Project, which seeks to improve access to mental health and addictions services for Black children, youth, and their families

Katelynn Thibert, Member of the Board of Directors for Epilepsy Southwestern Ontario (ESWO) and a Probation/Parole Officer. She is an advocate for her eldest son who lives with epilepsy

MODERATOR:

Mary Secco, co-creator of the Clinic to Community[®] health care linkage program and Chair of Global Outreach at the International Bureau for Epilepsy (IBE)

Date – Tuesday, September 27, 2022

Time – 5:30 to 6:30 PM EDT
